

Expression of Interest to support 'Energy Catalyst Round 8: clean energy access, feasibility projects', launched by Innovate UK.

Bennamann and Fleet Forum are gathering information from aid and development organisations regarding their interest in the 'Energy Catalyst Round 8: clean energy access, feasibility projects'. The partners wish to conduct a study concerning the feasibility of de-carbonising humanitarian vehicle fleets using cow-slurry, ultimately leading to sustainable energy business models for local communities in Sub-Saharan Africa, South Asia and South East Asia.

Completion of the Letter of Interest does not function as a formal application; however, it allows Bennamann and Fleet Forum to assess the level of interest and helps to secure funding to conduct a feasibility study and potential future grants.

Please complete the below fields and return the form to Rose.van.Steijn@fleetforum.org.

Yes, I am interested to participate in the feasibility study:

Name organisation:
Name contactperson:
Job title:
Email address:
Telephon number

Please indicate your area of interest (tick all that apply)

We can support by providing quantitative and qualitative fleet data of our operations in Sub-Saharan Africa, South Asia and South East Asia.

We can support by introducing Bennamann and Fleet Forum to local stakeholders (communities, local governments, local fuel suppliers, farmers, etc.)

Our sustainability department wants to get engaged as this solution has the potential to reduce CO2 emissions of our organisation.

Our programmes department is interested as this solution has the potential to provide sustainable energy solutions to beneficiaries.

Other, please indicate:
