

Re-examine your training strategy

- Do you provide general induction training for drivers?
- Do you assess training needs periodically? What knowledge and skills gaps do your staff have? What does your data indicate?
- How will automotive / humanitarian trends affect the learning needs of your drivers?
- Do you design a personalised training programme —giving priority to those at highest risk?
- Do you consider training for different vehicle types, e.g., motorcyclists, AVs etc. ?
- What actions do you take to ensure training leads to results?
